

Louise Aldridge

Frontend Developer, (React.js | TypeScript | JavaScript | Accessibility)

[Portfolio](#) | [GitHub](#) | [LinkedIn](#) | louisekald@gmail.com | Based in Worthing, UK

I'm a **Frontend Developer (CPACC)** specialising in accessible, responsive web interfaces, working with **React**, **TypeScript**, and **JavaScript**. I care about building things that are well-structured and usable by everyone - not as an afterthought, but as a core part of how I work.

Technical Skills

TypeScript, JavaScript, React, Vue.js, Vitest, Redux Toolkit, Zustand, API Integration, Tailwind, CSS, HTML, Git, GitHub, GitHub Actions, Vite, npm, Jira, Magento, WordPress, Figma

Projects

CoveUI ([Code](#) | [View Site](#))

- Built a reusable **React** and **TypeScript** design system featuring accessible, composable UI components with **MDX documentation** and scoped **CSS Modules** styling.
- Implemented unit testing with **Vitest** and **React Testing Library**, and configured a **GitHub Actions CI pipeline** to run tests automatically on every push, improving component reliability and maintainability.

RareKind ([Code](#) | [View Site](#))

- Built the frontend in a cross-functional team alongside backend developers, using **React**, **Redux Toolkit**, and **CSS Modules**.
- Implemented **JWT authentication** with protected routes for authorised users.
- Integrated with a **Node.js/Express REST API** to deliver full CRUD functionality across the application.

PinPoint ([Code](#) | [View Site](#))

- Developed a task-management application with **React**, focused on user motivation and habit tracking.
- Spearheading a full accessibility refactor to upgrade the legacy codebase to **WCAG 2.2 AA** standards.
- Conducting manual audits to document and resolve issues in **focus management** and **semantic structure**, ensuring a robust experience for **assistive technology**.

Dash and Dine ([Code](#) | [View Site](#))

- Developed a dynamic food ordering interface with **TypeScript** and **Tailwind CSS**, implementing state management for real-time item selection and total calculation.
- Refactored from **JavaScript** to **TypeScript** to improve type safety and maintainability.

Experience

AbilityNet - Digital Marketing Assistant (Accessibility)

June 2022 - May 2024

- Created and managed website content within a **Drupal CMS environment**, ensuring accessibility and usability standards were met.

- Adapted Dotdigital's embed sign-up form code to align with the company's **CSS** styling, delivering a quick fix in-house and avoiding delays from the external developer agency.
- Raised awareness about disability and **digital accessibility** by creating and designing content for social media, email campaigns, podcast channels, and the charity's website.
- Contributed to the planning, delivery, and promotion of **digital accessibility** conferences and webinars, enhancing both community engagement and my understanding of accessibility best practices.

Qvis Lighting & Security - eCommerce Team Leader (Jira, HTML, CSS, Magento, WordPress, SAP)

June 2021 - June 2022

- Designed, built, and styled new website pages using **Magento** and **WordPress** page builders, **HTML**, and **CSS**.
- Translated wireframes into functional website and app pages and improved product-category structures to enhance **UX** and navigation.
- Managed and resolved website/app support tickets in **Jira** Service Desk to meet SLAs, covering customer-account issues, bugs, and general technical incidents.
- Led a small team to streamline workflows and deliver website content on schedule, including creating an automated Google Sheet to align product data for CSV import with **Magento** requirements.
- Collaborated with the development team to investigate and resolve web-app issues identified through user feedback and manual testing, including inaccurate product-stock automation from **SAP**, customer-group store-view logic errors, and migration challenges during a **Magento** version upgrade.
- Led the transition from **MailerLite** to **Klaviyo** after presenting a migration plan to stakeholders, then built new automated flows and email campaigns, improving customer engagement by **22.5%**.

Qvis Lighting & Security - Web Administrator (HTML, CSS, Magento)

October 2019 - June 2021

- Revamped transactional **HTML** emails to improve clarity, branding consistency, and overall customer engagement.
- Managed website content in **Magento** by regularly adding and updating products, brands, categories, and supporting content to maintain accuracy and improve user experience.
- Created standardised templates for product data, images, and technical sheets to ensure consistent, high-quality presentation across the website.

Education

Software Development Tech Finishing School Bootcamp

TechNative Digital, September - December 2025

- **JavaScript** fundamentals, **API** handling
- **React** and state management libraries such as **Redux** and **Zustand**
- Version control, code reviews, and team collaboration with **Git** and **GitHub**

Certified Professional in Accessibility Core Competencies (CPACC)- IAAP, Issued August 2024

MA Digital Media: Distinction - University of Sussex, September 2018 -September 2019

Ba Hons Media: 2:1 - University of Chichester, September 2014 - September 2017
